

Thin Client

Thin Client is a robust and versatile computing platform designed to perform reliably in hostile environment conditions such as underground mining.

Features

Low power consumption

Fanless motherboard and CPU

Built-in keyboard and mouse

Wide angle viewing LCD screen

Diskless operation, configurable to boot up from configured servers

Desktop-like feature powerful enough to run demanding applications

High tolerance to shock, vibration and rough handling

May be configured to meet the NERZ classification

Housed in a water-tight, dust-tight enclosure

Lockable keyboard drawer to prevent unauthorised access

Benefit

Reduced the cost of deploying, updating and maintaining software

Simplified software version control process

Reduced the cost of software licensing

User access at the workplace

Specification

CPU	80x86 300 Mhz Processor
Memory	ROM up to 256 MB 64 MB RAM
Display	15" LCD
Keyboard	IP65 (NEMA 4) keyboard with integrated mouse
Server software	Microsoft Terminal Services or Citrix ICA Metaframe
Supply	110V/240V AC (Auto sensing)
Parts	10/100 Base Tx Serial
